The NodOn® Wall Switch is wireless and battery-less, EnOcean® compliant. The mechanical energy created by pushing the button(s) is transformed, via a revolutionary magneto-resistive generator, in enough electrical energy to send a radio frame to the controlled device. The Wall Switch allows to control any kind of EnOcean® compliant device, such as the NodOn® Smart Plug, or a Home Automation Gateway.

The Wall Switch is delivered with 1 simple button (to control 1 group of devices) and 2 half buttons (to control 2 groups of devices).

The Wall Switch has a wall plate, to guarantee an easy mounting into the house: using screws of a mounting box, screwing it on the wall, or simply using the double sided tape strips at the back of the wall plate

Technical Data

Power source - Magneto-resistive (no battery)

4 buttons - 2 channels or 1 button - 1 channel (both solution included in packaging)

Wall mounting using adhesive bonding (included) or screws (not included)

Operational temperature - 0°C to 40°C - Altitude - 2.000m

Radio protocol - EnOcean® - 868.3MHz - EEP - F6-02-01

Range: 30m indoor

Dimension : 80*80*15mm

Warranty 3 years

Standard

EN 301489-1 V1.9.2; EN301489-3: V1.4.1

EN 62479: 2011-9

EN 60950-1:2006+A11:2009+A1:2010

EN 300220-1: V2.4.1; EN 300220-2: V2.4.1
